

Solve Me First FP

This is an introductory challenge. The purpose of this challenge is to give you a working I/O template in your preferred language. It includes scanning \$2\$ integers from `STDIN`, calling a function, returning a value, and printing it to `STDOUT`.

Your task is to scan two numbers, \$A\$ and \$B\$ from `STDIN`, and print the sum \$A+B\$ on `STDOUT`.

Note: The code has been saved in a template that you can submit if you want.

Input Format

You are given two integers, \$A\$ and \$B\$ on separate lines.

Output Format

Output an integer that denotes \$A+B\$

Constraints

\$1 \le A, B \le 1000\$

Sample Input

```
2
3
```

Sample Output

```
5
```
